PROFILE

Software developer building modern web applications with a focus on usability, technical fundamentals, and practical AI integration. Translate requirements into implementation plans, investigate root causes, and validate software behavior through automated tests. Use AI to explore solutions and support development while retaining responsibility for technical decisions and final verification. Seeking a collaborative team where I can contribute to useful products and continue growing.

SELECTED PROJECTS

Reficera · Personal finance application · In development

Next.js · React · TypeScript · PostgreSQL | [Project preview](#)

- Built an authenticated application for budgeting, transaction management, and monthly and annual financial reporting through dashboards and charts.
- Implemented verified sessions and user scoped access for budgets, subcategories, and transaction reads and writes.
- Covered budgeting, transactions, authentication, ownership boundaries, and dashboard journeys with automated tests, including Playwright.

Web Optima Studio · Web design studio website · In development

Astro · HTML · CSS · JavaScript | weboptimastudio.com

Built a focused website for my web design studio, presenting its services clearly and guiding prospective clients toward inquiries.

Cuban Cake · Local bakery catalog · In development

HTML · CSS | cubancake.com

Created a cake catalog that helps customers browse designs and find options for their next celebration.
